Sub subtitle

Load Arbuthnot's data:

This is how you load the data

```
load(url("https://github.com/GarciaRios/LBJ_SDA/raw/main/Labs/lab1/Data/arbuthnot.RData"))
```

Exercise 1: and this is my answer for ex 1

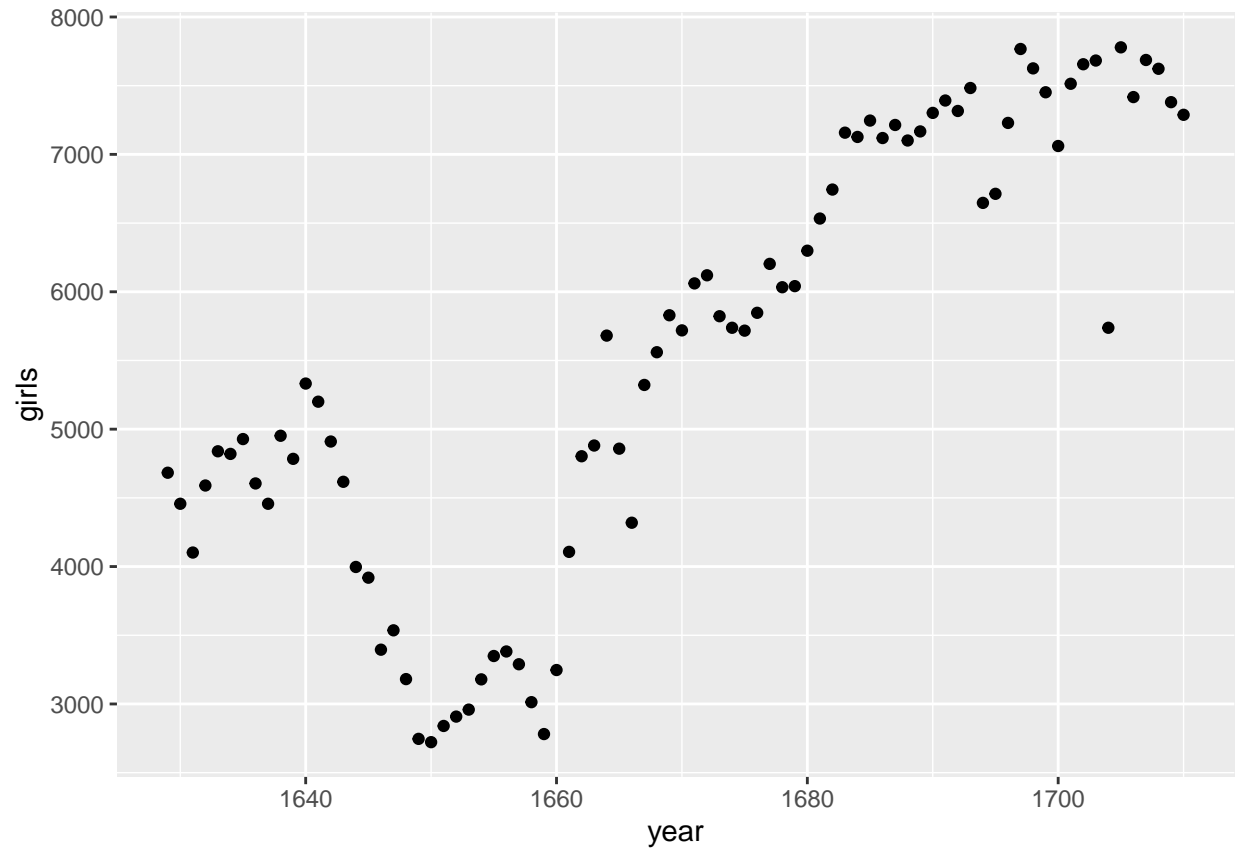

```
qplot(x = year, y = girls, data = arbuthnot)
```

```
## Warning: `qplot()` was deprecated in ggplot2 3.4.0.
```

```
## This warning is displayed once every 8 hours.
```

```
## Call `lifecycle::last_lifecycle_warnings()` to see where this warning was
```

```
## generated.
```

code for Exercise 1 is already entered below as an example

Exercise 2: [Enter your response for Exercise 2 here.]

enter your code for Exercise 2 here

enter your code for Exercise 3 here

Exercise 3:

On your own:

Load present day data:

```
load(url("https://github.com/GarciaRios/LBJ_SDA/raw/main/Labs/lab1/Data/present.RData"))
```
