Congress Check on Presidential Power

Thinking about the relationship between Congress and the president, do you think Congress is doing [too much, too little,] or about the right amount to serve as a check on presidential power?

N+ Univision Texas October Poll - Base

Online sample of 1,000 Texas voters fielded from October 13 to October 21, 2026.
Margin of error: +/-3.8%.

This survey is based on 1,000 interviews conducted by YouGov on the internet of registered voters in Texas. The sample was weighted according to gender, age, race/ethnicity, education, and state region based on voter registration lists, the U.S. Census American Community Survey, and the U.S. Census Current Population Survey, 2022 general election turnout, as well as 2020 Presidential vote and approximate 2024 Presidential vote based on available results. Respondents were selected by YouGov to be representative of registered voters in Texas. The weights range from 0.1 to 6.06 with a mean of 1 and a standard deviation of 0.72.

The margin of error (a 95% confidence interval) for a sample percentage p based upon the subsetted sample is approximately 3.8%. It is calculated using the formula:

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + \text{CV}^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
